

Patapsco's Liberator "S" Special Packages

Special Packages and Pricing for the Liberator "S" ISDN converter

Features

- Common capabilities with all other Liberators
- Includes all advanced routing and switching

Overview

The standard Liberator "S" is available populated with many different port configurations supporting a maximum of 4 PRIs and up to 16 BRIs. The Liberator "Packages" are designed to be particularly affordable for more common applications.

The "Packages" are available in the following configurations:

Special Liberator "S" Packages

- Liberator (AC PSU) complete with 1 (switchable) PRI and 4 BRI ports (NT only).
- Liberator (AC PSU) complete with 1 (switchable) PRI and 8 BRI ports (NT only).
- Liberator (AC PSU) complete with 1 (switchable) PRI and 16 BRI ports (NT only).
- Liberator (AC PSU) complete with 2 (switchable) PRI and 4 BRI ports (NT)
- Liberator (AC PSU) complete with 3 (non-upgradeable) PRIs zero BRI ports.

Part Number

- 3050/1P4B/NT
- 3050/1P8B/NT
- 3050/1P16B/NT
- 3050/2P4B/NT
- 3050/3POB

Price

- UK£ 1,075
- UK£ 1,450
- UK£ 2,250
- UK£ 1,425
- UK£ 1,500

For a Liberator with 4 PRIs see the Liberator "Q"

Support extra

As you can see they support BRI NT ports only (an NT port looks like a carrier-delivered ISDN and you would normally plug user devices into it).

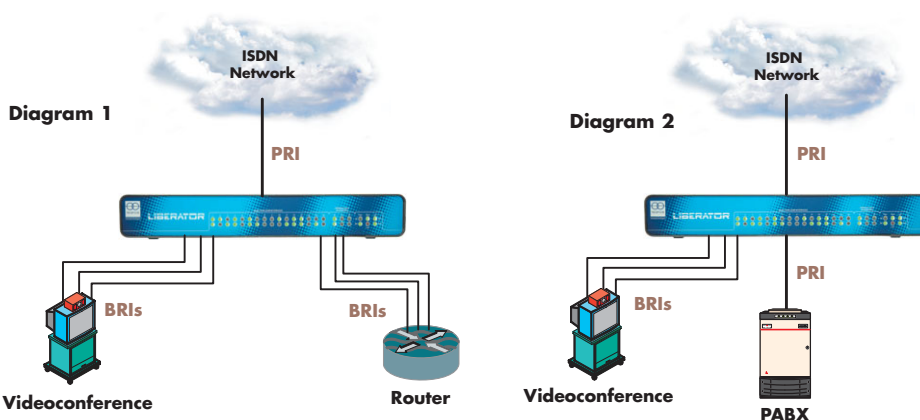

The standard Liberator "S" has an option to support TE ports (a TE port is a user port and would normally be plugged into a network and therefore require appropriate Telecoms approvals etc).

The PRI ports can be user-switched between TE and NT, as per the standard version, and can be configured for E1 or T1. E1 to T1 conversion is available on the standard Liberator "S" or Liberator "C"

The (rarely-required) BRI Power Feed option is not available on the Package and the Packages come with internal quality AC supplies (no DC option).

Please refer to the Liberator Range Product Comparison, the Liberator "S" Technical Specification and the Liberator Ordering Information documentation.

Example Applications

In summary, the Liberator "S" packages are extremely well priced for these smaller and simpler applications.
