

- Product Range Summary
 - Liberator Range
 - Flexible ISDN PRI/BRI cross connect switch/converters
 - LanBand/PacketBand Range
 - Delivers ISDN BRI/PRI or TDM circuits across a LAN/IP Network (CESoIP, Pseudowire)
 - iMUX Range
 - ISDN aggregator/inverse multiplexor to transport X21,V35,RS530 data signals
 - User friendly GUI interface

Use *Liberator* with Video Conferencing Systems

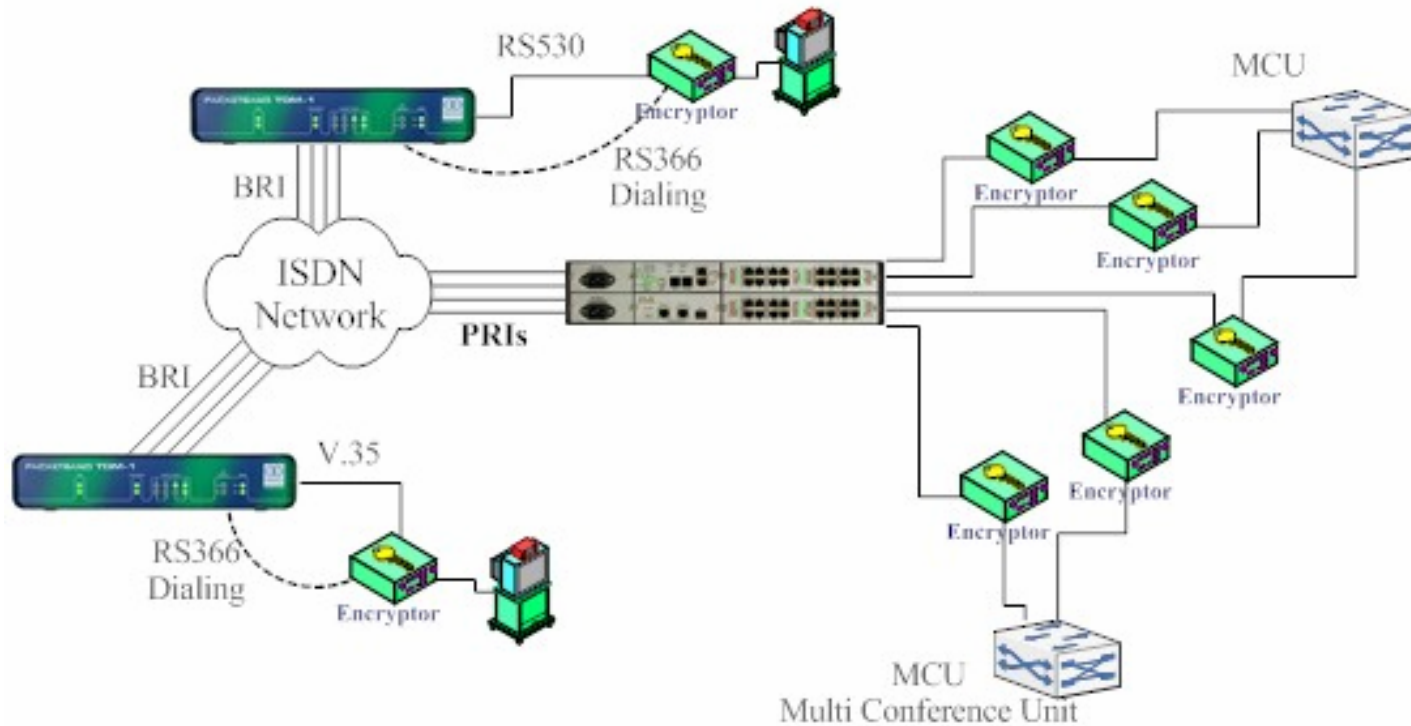

- Benefits in using *Liberator* with Video Conferencing Systems
 - Flexible ISDN conversion/sharing
 - Cost effective use of BRI and PRI services
 - Simple low cost “drop-in” system
 - Encryption versions for secure video conferencing applications and MCUs

Use *LanBand* with Video Conferencing Systems

- Benefits in using *LanBand* with Video Conferencing Systems
 - Distributes and switches ISDN over a customer's LAN
 - Much lower price than ISDN/IP Gateway products
 - Interconnection with other VC systems which have ISDN interfaces
 - Retains network synchronisation at all end points
 - Overcomes ISDN driving distance limitations
 - No special cable-runs are needed : use existing cable runs
 - Automatically switches and shares ISDN services
 - Ideal for all ISDN VC and roll-around units

Use *iMUX* with Video Conferencing Systems

- Benefits in using *iMUX* with Video Conferencing Systems
 - Enhance or replace end of life equipment such as Adtran, AccessSwitch and Oasis products which are no longer supported
 - Target market is existing military and security users

- PatapSCO Background

- Established over 20 years ago in the UK
 - All products designed, developed and manufactured in UK
- Customers include carriers, large corporates, system's integrators, distributors, resellers, government/military and SMEs
 - Deployed globally – majority of sales outside UK
- Excellent pre and post sales technical support
